[{journal_title}] Request for manuscript review : {atime}

Sender : {journal_title}
Recipient : {rName}
Manuscript ID : {order_num} **1**
Title : {subject}
Review Period : {assign_date}{sdate} ~ {pdate}

Dear Dr. {rName} :

You have been recommended as a reviewer for the above-mentioned manuscript. Given your knowledge and expertise in the subject area of the manuscript, we would be most grateful if you would find time to review the manuscript.

{sendmemo}

{agree_date}
{abstract}

You are kindly requested to visit <http://submit.e-ja.org/>, log in with your I.D. and password, and go to the Reviewer Center. Please read the Instructions for Reviewers and proceed as guided.

If you accept this invitation, I would be very grateful if you would return your review within 2 weeks.

If you will not be able to provide comments within this time frame, please let me know immediately by replying this e-mail.

Sincerely,

Myung-A Kim, M.D., Ph.D.
Editor-in-Chief

Title	Cost effectiveness of the Use of Statins in the Korean Population		
Running title	Cost effectiveness of Statins in Korean Population		

Abstract	
Abstract	Objective: Statins reduce risk of cardiovascular disease through lowering of LDL-C (Low Density Lipoprotein cholesterol). We analyzed cost-effectiveness of statins in the reduction of serum LDL-C level among Korean population at high cardiovascular risk. Methods: Rosuvastatin (5, 10, and 20 mg), atorvastatin (10, 20, 40, and 80 mg) and simvastatin (20, 40, and 80 mg) were included for the analysis, because those statins and doses were mostly prescribed in Korea. We determined effectiveness as % reduction of LDL cholesterol (LDL-C) levels per mg dose and % population reached to the ideal LDL-C level (< 100 mg/dL), which is the target goal of LDL-C level for the high cardiovascular risk group as recommended by NCEP-ATP III guideline. The annual cost, which included overall cost for the drug price and management during follow up, was calculated. Average cost-effectiveness ratio (ACER) was calculated and used as the parameter representing cost-effectiveness of each statins. Results: The lowest dose of each statins showed that achieving LDL-C target level was not high even in subjects showing relatively low basal LDL-C levels (<160 mg/dL). Also in

논문심사하기

- 1** 심사할 논문파일을 클릭하여 심사합니다. (PDF파일)
- 2** Recommendation 을 체크합니다.
- 3** 평가표를 작성합니다. (1차 심사 시에만 작성)
- 4** 저자 지적사항 및 편집위원장에게 보내는 글을 작성하시면 됩니다.

- 5** "PDF Review file(File Modify)" 클릭하여, **1** 에서 저장된 파일로 계속 작성할 수 있습니다. PDF Writer 심사에 대해서는 다음 페이지에서 설명 드리겠습니다.
- 6** "Submit"은 제출완료 입니다. (심사기간이 남아 있어도 수정할 수 없습니다.) "Temporary Save"는 임시저장 입니다. 저장 후 심사기간 내에 제출하시면 됩니다.

PDF Writer 논문심사

- 1) **1** 과 같은 기능으로 별도의 프로그램 설치 없이 홈페이지에서 직접 논문심사를 할 수 있습니다.
주요기능 : 선긋기, 언더라인, 빨간펜 기능, 지적사항 작성(메모삽입) 등의 기능을 이용하여
논문의 지적사항을 표기하시면 됩니다.
- 2) "Save" 버튼을 클릭하여 저장(서버에 저장됩니다) 후, 다음에 계속 작성하실 수 있습니다. (7페이지참조)
